The mission of Hope Central in the city of Watts is to reach the lost with the gospel of Jesus Christ. Within this area there are four government housing projects, mostly known for poverty, violence, gangs, murder, drugs and prostitution. We have planted a church at a community building in a park and rent a house in the same block as a launching pad for ministry and missions in this inner city. We bring the church to the community. Out of this church plant Love Watts was born, an outreach ministry dedicated to taking the Gospel to the people. The vision is clear: to win, encourage and instruct people that a true change can only come from a redeemed life in Christ through the transforming power of the Holy Spirit.
